Since 2006, Arte Laguna Prize is the international art competition open to multiple disciplines – visual, performing, multimedia, landscape and digital arts – for the enhancement of contemporary art and the mapping of its current state. It was created to give the opportunity to art talents, more or less young, to emerge, to be noticed by the general public and by the jury composed of important names in the contemporary art scene, as well as to allow a democratic comparison between international artists .

The virtuous circle of Foundations, Museums, Galleries, Residences and Spaces for Art, Made in Italy Companies and International Brands, allows the realization of special projects and concrete opportunities for growth and momentum for the professional career of artists.
